

Environmental Policy

REM delivers service and support, and mainly undertakes business in the offshore industry. The goal is to reduce the company's environmental impact. This means our business is conducted in a manner that assures optimum protection of the environment, in compliance with ISO 14001:2015, relevant laws and regulations. Efficient use of natural resources and waste reduction are key factors in achieving these objectives.

This Policy commits the company to:

- Ensure that all employees understand our environmental policy.
- Reduce our environmental impact and continuously improve our business strategy and operating methods.
- Prevent damage to the environment.
- Improve energy efficiency and environmental performance.
- Minimize our consumption of natural resources.
- Purchase products and services that do the least damage to the environment.

REM will always encourage our customers, suppliers and all business associates to meet or exceed the standards of this policy.

Fredrik Remøy
Chief Executive Officer
